Subject: RE: Accounting for cold vs hot water

Mike,

It was nice meeting you, we believe that the meeting went well with the local water users. Again we want to thank you for the help resolving Raser's balance issues. Everything on the annual report listed under a34489 is Thermo No. 1 BE-01, LLC cold water. Intermountain Renewable Power LLC geothermal water (hot) is under 71-5147, 71-5146, and 71-5107. You should have received the change of address information in the mail, if you have any questions, let me know.

Thanks,
Mike

Subject: Accounting for cold vs hot water

Mike, good to meet you at the meeting.

I got the anonymous check into the old raser account and that really helped things out.

That account will be closed and the new accounts for Intermountain and Thermo 1 will be billed for 2012 but that is based on last years water use...

What I need from you is to separate and provide an accounting of the hot water vs cooling- cold water so I can properly attribute the charges to each account:

Please see the annual report that was handed out at the meeting.

Towards the back is a listing of Intermountain renewable power LLC water use for 2011 with the respective water right numbers listed.

I need you to identify for me which water right numbers are the "hot" vs which are the "cold"

if you do this for me I will separate the gallons/acre feet used in that proportion.

I am assuming that Intermountain is the cold water account and Thermo 1 is the hot water account. Let me know if this is correct.

I need this information in the next week so I can do my assessment accounting.

Call if you have any questions or need to discuss.
